DETAILED ACTION

Oath/Declaration

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, the limitation "or spherical" was not described in the original specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, wherein the limitation "polygon-shaped ball" does not clearly include such a limitation as "spherical" wherein a "polygon-shaped ball" is interpreted as having a plurality of discrete segments, thus not including a spherical shape, which is continuous.

Reissue Applications

3. Claim 1 is rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application. In the instant case, the omitted limitations "a third and two thirds" and "to 45-degree angles from the vertical" were originally surrendered by applicant to obviate Examiner Moy's rejection, thus resulting in improper recapture of surrendered subject matter.

4. Claim 1 is rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

Claim 1, Line 1, "or spherical"

Claim 1, Line 12, "or spherical"

Col. 1, Line 26, "or have a spherical shape"

Col. 1, Line 65, "or spherical shape"

Col. 2, Line 35, "or spherical shape"

Col. 2, Line 60, "or sphere"

Col. 3, Line 17, "or spherical shape"

Col. 3, Line 50, "or sphere"

Col. 4, Line 40, "spherical shape"

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
